8. Documents & upload
9. Provenance & traceability
10. Roadmap

1. Overview

TaxHub helps a fund-management back office answer one question fast: **"which tax form do I need to file, and where?"** — and then traces that form back to the **underlying legislation**.

It combines three things:

- A **form-finder corpus** — tax forms scraped from official revenue authorities across JTC's fund domiciles, classified by jurisdiction, category and filing type.
- An **AI Assistant** — a LangGraph orchestrator (xAI Grok) that routes your question to the right specialist agent and answers with cited sources.
- A **legislation/provenance layer** — the primary law each form implements, kept as links so answers are traceable, not just plausible.

2. What it does

- **Finds the right form** for a described need (e.g. *"Cayman economic substance notification"*) and opens it in the viewer.
- **Answers tax-law questions** (e.g. *"what does CIGA mean?"*) with citations to the tracked legislation/guidance corpus.
- **Tracks changes** — every tracked document is versioned; amendments get a plain-English AI summary.
- **Stores and serves PDFs** — forms are stored on the server and viewable inline; online-filed forms link out to the official portal.

3. Filing types

The most important label on every form is **how it is filed**:

Filing type	Meaning
Downloadable form	A PDF you complete and submit.
Online filing	Filed via a web portal / e-file — there is no PDF to complete; the record links to the portal.
Reference / guidance	A user guide or guidance note — <i>not</i> a fileable form.

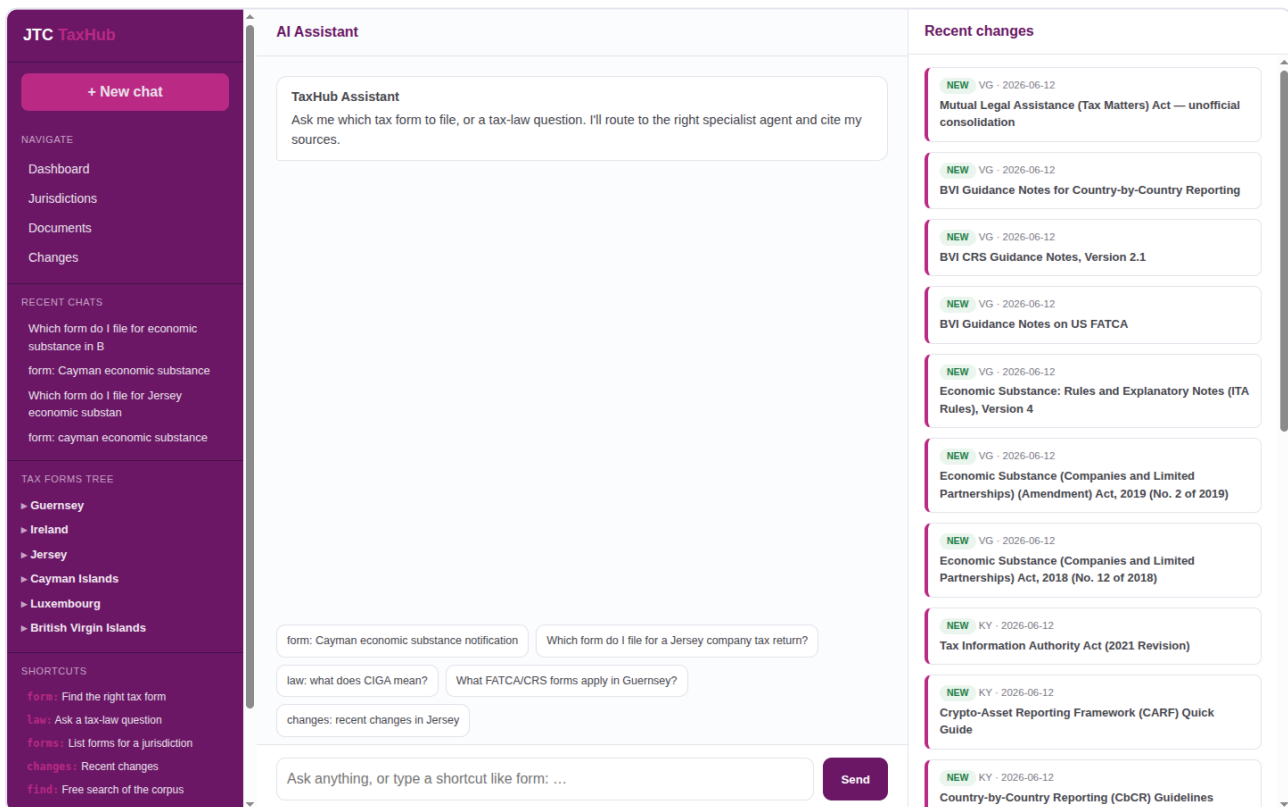

This distinction is shown in the Assistant's answers, on each form's detail panel, and as a filter in the Documents browser.

4. Coverage audit — what each authority actually offers

Not every jurisdiction publishes downloadable forms; several require online filing and publish only guidance. TaxHub captures this honestly:

Jurisdiction	How you actually file	What the site offers	filing_type
Luxembourg (ACD)	Complete & submit PDF	126 real fillable forms (200/300/500/710...)	downloadable
Guernsey (gov.gg)	PDF forms (main return online)	71 real forms (registration, tax-cap returns...)	downloadable
Jersey (Revenue Jersey)	Online portal	No downloadable form	online
Ireland (Revenue)	ROS e-file	PDFs are TDM guidance, not forms	online + reference
Cayman (DITC)	DITC portal	PDFs are user guides	online + reference
BVI (ITA)	BOSS portal (via agent)	PDFs are guidance/methodology	online + reference

5. Using the AI Assistant

The centre pane is a streaming chat. Ask in plain English; the **orchestrator** routes to a specialist agent and streams the answer with the agent shown working:

- **DocumentAgent** — finds the correct tax form(s) for a need.
- **LawAgent** — answers tax-law questions over the legislation corpus (graph-RAG).
- **MetadataAgent** — lists forms / deadlines for a jurisdiction or category.
- **ChangesAgent** — reports recent changes to tracked documents.

Answers keep `[form:N]` / `[doc:N]` markers — click them to open the form PDF or source document in the right pane. **Suggestion cards** under the input offer starting points.

6. Shortcuts

Type a prefix in the chat box to go straight to a capability:

Shortcut	Does
<code>form:</code>	Find the right tax form for a need
<code>law:</code>	Ask a tax-law question (graph-RAG)
<code>forms:</code>	List forms for a jurisdiction (e.g. <code>forms: KY</code>)

Shortcut	Does
changes :	Recent changes (optionally by jurisdiction)
find:	Free search of the corpus

7. The Forms Tree

The left pane shows a navigable taxonomy:

Jurisdiction → **category** → **document type** → **form**

Categories include corporate tax, economic substance, AEOI (FATCA/CRS), beneficial ownership, partnerships, and fund-specific. Drill down and click a form to open it.

8. Documents & upload

← Assistant

Documents

209 of 215 documents shown · search and filter below, or upload a new PDF (pushed to the server volume).

Search documents...

All jurisdictions All categories All filing types

JUR	FILING TYPE	CATEGORY	DOCUMENT	PDF
GG	Downloadable form	Corporate tax	2023 Open Market Tax Cap Return (Form A2) [274kb]	
GG	Downloadable form	Corporate tax	2023 Standard Charge Application (Form B) [155kb]	
GG	Downloadable form	Corporate tax	2023 Tax Cap Return (Form A) [259kb]	
GG	Downloadable form	Corporate tax	2023 Tax Cap Return, Alderney (Form A) [171kb]	
GG	Downloadable form	Corporate tax	2023 UK/Guernsey or Jersey/Guernsey Double Taxation Agreement Return (Form C) [276kb]	
GG	Downloadable form	Corporate tax	2024 Agency Return [186kb]	
GG	Downloadable form	Corporate tax	2024 Open Market Tax Cap Return (form A2) [184kb]	
GG	Downloadable form	Corporate tax	2024 Standard Charge Application (Form B) [157kb]	
GG	Downloadable form	Corporate tax	2024 Tax Cap Return (form A) [161kb]	

The **Documents** page lists every stored-PDF document with **search and jurisdiction / category / filing-type filters**. It also has an **upload form**: drop a PDF, set jurisdiction + category, and it is pushed to the server volume and registered — useful for adding forms without server access.

Clicking a document opens it in the PDF viewer (right pane); online-filed forms link to the official portal instead.

9. Provenance & traceability

Forms are the primary corpus; **legislation is linked, not duplicated**. Each form carries a `legislation_ref` to the law it implements, shown as "*Underlying law*" on the form panel. The LawAgent answers over the tracked legislation/guidance corpus (`(:Document)` nodes) and cites its sources, so every answer can be traced back to the official text.

10. Roadmap

- **PDF highlight & provenance** — pdf.js viewer that jumps to and highlights the cited passage.
 - **Wider jurisdiction coverage** — extend the scraper pattern to all JTC domiciles (Isle of Man, Mauritius, Netherlands, Switzerland, Singapore, Hong Kong, USA, UK, South Africa, UAE).
 - **Change digest & alerts** — scheduled per-jurisdiction summaries of what moved.
-

JTC TaxHub · built on FastHTML, Neo4j AuraDB, and xAI Grok.
